Yochana IT Solutions Inc.

12 Elliot Street East, Windsor, Ontario, N9A1C2, Canada

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Software Programmer position at Yochana IT Solutions Inc., as advertised. As an M.S. Computer Science student specializing in full-stack and AI-powered systems with a strong background in Java Spring Boot and React, I am confident my skills and experience align perfectly with your requirements for developing and enhancing cloud-based software features for your client projects.

My experience includes engineering a secure full-stack blog platform using Java, Spring Boot, Spring Security, and React, where I designed RESTful APIs following a layered architecture and implemented robust JWT-based authentication with role-based access control. Furthermore, in my AI Resume Tailoring Platform project, I engineered a full-stack application with FastAPI and React, building a real-time SSE streaming pipeline for live backend progress events and designing a 5-metric ATS scoring engine, demonstrating my ability to deliver high-quality, performant web applications.

I possess hands-on experience with key technologies such as Spring Boot, React, PostgreSQL, and Docker, which are directly relevant to your development environment. My proficiency extends to designing scalable backend architectures, integrating system components through secure APIs, and contributing to automation of build and deployment workflows, all of which are critical for this role.

I am eager to leverage my expertise in full-stack development, cloud-based deployments, and collaborative Agile methodologies to contribute to Yochana IT Solutions Inc.'s success. Thank you for considering my application; I would welcome the opportunity to discuss how my skills and passion for software engineering can benefit your team.

Sincerely,

Muhammad Umar Khan
